Visualize your data flow on source, object, and column-level

Visualize data movement at the source, object, and column levels to fully understand dependencies and transformations.

Map non-standard sources with manual data lineage

Document custom or unsupported systems manually, ensuring no data source is left untracked. Paint the full picture of your data ecosystem.

We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

End-to-End Data Visibility

Gain a complete view of data movement across your organization from source to destination, supporting better data management, governance, and decision-making.

Trusted Data for Analytics & AI

Ensure data feeding analytics, machine learning, and AI initiatives is accurate, consistent, and traceable, powering smarter business decisions.

Fast Impact Analysis

Quickly understand how changes to tables, columns, or processes affect downstream systems. Reduce errors, prevent disruptions, and make changes with confidence.

Faster Troubleshooting & Issue Resolution

Identify bottlenecks, errors, or inconsistencies in your data pipelines quickly, reducing downtime and improving operational efficiency.

Dataedo

Regulatory Compliance & Audit Readiness

Track sensitive and regulated data through every step of its flow. Ensure audit-readiness, maintain compliance, and avoid costly fines.
