Boost your transition to data-driven culture

Power BI is a business analytics service which aims to provide interactive visualizations and business intelligence capabilities with a simple interface which allows every user to create their own reports and dashboards.

Dataedo provides additional layer to Power BI - data lineage and documentation. It allows you to explain all your tables, columns, reports and report fields, document table relationships, visualize the data model, and share everything with your team in convenient, interactive documentation. This makes understanding your databases and creating reports easier than ever.
