Boost your transition to data-driven culture

Tableau is a powerful platform for visual analytics that revolutionizes the process of using data to tackle complex issues. By enabling individuals and businesses to effectively leverage their data, Tableau empowers them to achieve their goals with greater ease and success.

Dataedo provides additional layer Tableau - data lineage, report catalog and data documentation. This allows you to explain all your tables, columns, reports and report fields, document table relationships, visualize the data model, and share everything with your team in convenient, interactive documentation. With Dataedo understanding your databases and creating reports will be easier than ever.

This website uses cookies

We use cookies to personalise content and ads, to provide social media features and to analyse our traffic. We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

Quickly document your Tableau Data Model

Better understand sources of your data

Understand where the data powering your reports is coming from and how it is transformed. Increase trust in data and ensure accurate reporting through data lineage.
