

# AI Governance Platform: Govern AI models with clear lineage and data context

Use Dataedo's catalog and lineage to track where AI models get their training and scoring data, document pipeline logic, and demonstrate compliance for AI-risk assessments.

#### Factors & Training Data

The model is trained on the credit\_data and dataset assets visible in the workspace sidebar. Key features include:

- Historical repayment behavior.
- Current outstanding debt.
- Credit utilization rates.

#### Metrics & Validation

- **Status:** Succeeded.
- **Stage:** Development.

We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

## No end-to-end lineage

There's no audit-ready, visual view of how data flows into, through, and out of AI models.

# Dataedo

## Rapid model iterations

Rapid model iteration leads to data and logic changes that aren't reflected in documentation, creating risk and confusion.

stores, and batch/stream pipelines. Organize datasets under subject areas like Customer Risk or Fraud Detection.

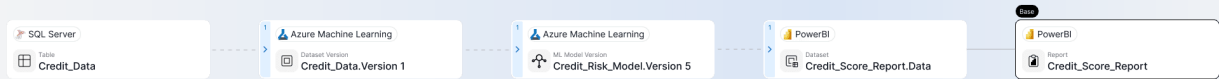

Use the Data Catalog to describe model features, feature-engineering logic, and business definitions. Link each model input back to underlying tables.

## Build data lineage for ML pipelines

Use Automatic Data Lineage to visualize how raw data moves through model retraining workflows.

## What you get

### Clear AI data lineage

Understand exactly what data feeds each AI model, where it originates, and how it moves across systems.
