We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

Connect Dataedo to your key databases, warehouses, and supported platforms. Automatically import technical metadata to build a single catalog of all data assets.

PII, PHI, financial, and other regulated data. Search for typical sensitive patterns (e.g., "email," "ssn," "card") and tag matching columns consistently.

PII - Personally Identifiable Information by Level

See how sensitive data moves

Use Data Lineage to see where sensitive columns come from and where they go. Identify which ETL processes, views, and reports use regulated data. Document retention, masking, and aggregation rules on lineage diagrams.
