

Impact Analysis: Understand impact before making database changes

Before you rename a column or change a data type, see every report, dashboard, and ETL job that uses it. Plan changes without surprises.

See what breaks before you change anything

Schema changes. platform migrations. and table refactoring always carry risk.

>

Unknown downstream impact

Without visibility, it's unclear which reports, dashboards, or processes will break after a change.

Manual dependency checks

Analysing data dependencies manually takes days and still leaves gaps in understanding.

Production surprises

Untracked changes lead to broken pipelines, failed reports, and emergency rollbacks.

Why our customers love Dataedo?

Dataedo is a lightweight solution with great customer service and active product development (recently data

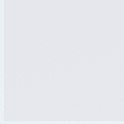

quality). The ability to run SQL scripts on the repository brings additional flexibility.
