

Trusted Reporting: Understand where your reports and KPIs really come from

When numbers don't match, Dataedo shows how data flows from source systems through ETL into your BI reports, so you can quickly find the cause and fix it.

Unknown data sources

Teams lack visibility into which tables, views, and ETL jobs feed dashboards and reports.

Time-consuming investigations

Investigating issues consumes days of developer time and often involves long email chains.

Risk of downstream errors

Fixing one problem risks breaking another report downstream.

How can a business user verify if a report is "certified" or accurate?

Can Dataedo help explain complex calculations in "plain language"?

What happens to report trust when the underlying data structure changes?

Dataedo is a lightweight solution with great customer service and active product development (recently data quality). The ability to run SQL scripts on the repository brings additional flexibility."
