Data challenges in financial services

Financial institutions operate in one of the most regulated and data-intensive environments in the world. Yet many still rely on tribal knowledge and manual documentation to manage critical data flows.

Limited lineage visibility

When auditors or regulators ask where a number came from, teams struggle to trace it from source system to final report.

Inconsistent definitions

Finance, Risk, and Compliance often use different definitions for the same KPIs. This leads to confusion, reconciliation efforts, and loss of trust.

Business glossary for financial terminology

Standardize critical metrics and definitions across the organization. Document terms like "Capital Adequacy Ratio," "Risk Exposure," or "Expected Credit Loss" to ensure everyone uses the same language. Reduce confusion or reconciliation efforts between departments.

Dataedo

Expected Credit Loss

Published

The estimated loss a bank may face if a borrower defaults on a loan or credit obligation. ECL considers the probability of default, exposure at default, and expected recoveries, helping banks assess credit risk, set provisions, and comply with IFRS 9 standards.
