We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

Inconsistent definitions

Different departments may define metrics such as "readmission rate" or "length of stay" differently, leading to confusion and reporting inconsistencies.

Data silos

EHRs, lab systems, billing platforms, and analytics tools operate independently, limiting visibility into how patient and operational data flows across the organization.
