Legacy systems

Many agencies rely on aging systems and undocumented data structures, making it difficult for teams to understand how data is stored and used.

Transparency requirements

Public organizations must demonstrate how data is used in reporting, policy decisions, and public disclosures.

Limited lineage visibility

When data is used for reports, policy analysis, or public dashboards, teams often struggle to trace where the data originated and how it was transformed.

teams understand how government data is structured and used.

trust in government reporting.

Business glossary for consistent definitions

Standardize definitions for key government metrics, programs, and reporting terms. Ensure that teams across departments use the same terminology, improving collaboration and reducing confusion.

Citizen Record Published

A comprehensive dataset that contains information about an individual's interactions with government services, programs, and benefits. Citizen records are used for reporting, policy decisions, and service delivery while ensuring privacy and compliance.
