

Dataedo documentation

Dataedo is an intuitive and lightweight tool for data governance, observability, and data discovery. It simplifies cataloging, publishing data structure definitions, and assessing data quality across various data sources. Built to support team collaboration, Dataedo unlocks the value of your data assets with end-to-end metadata management tools. With automated data quality checks, Dataedo also promises to bring accuracy, consistency, and reliability to your organization's data.

Unlock the power of your data

Imagine that your company generates mountains of data every second—an endless stream of business potential. Yet, instead of driving insights, your talented data professionals spend hours untangling where the data lives, what it means, and whether it can even be trusted. There's only one possible outcome: opportunities slip through the cracks, and your teams are left feeling stuck and frustrated.

Dataedo helps your teams transform this chaos into clarity. Our tools empower your entire organization—from seasoned data experts to non-technical business users—to understand, trust, and harness your data with

How Dataedo works

[Dataedo repository](#) is a centralized database designed to keep all your metadata organized in one place. With the [Dataedo Scheduler](#), you can automate metadata imports, ensuring your repository stays current with minimal effort. The [Dataedo portal](#) then offers an intuitive interface for viewing, searching, and managing your data documentation, allowing teams to collaborate effectively and maintain accurate, up-to-date information about your data.
