Secure Product

Every feature we build follows secure development practices from design to deployment - with rigorous testing, code review, and continuous security updates built into our process.

Organizational Security and Secure Processes

We ensure security with ISO 27001 compliance, strong policies, employee training, access management, legal compliance, and regular audits to maintain robust internal processes.

Compliance You Can Rely On

Dataedo is proud to adhere to two of the most trusted global standards for data and privacy protection.

With Dataedo, you can trust that you're choosing a partner committed to compliance and your security.

About

This website uses cookies

We use cookies to personalise content and ads, to provide social media features and to analyse our traffic. We also share information about your use of our site with our social media, advertising and analytics partners who may combine it with other information that you've provided to them or that they've collected from your use of their services.

Strong Security Controls

Our robust security framework ensures you're working with secure IT software.

These are some of the controls that make it happen:

Authentication & Access Control

SSO authentication with role-based permissions ensure only authorized users access your metadata environment.
